## **Centurion Vault protection of high value assets**

### Key Features

- Optimum protection for high value assets
- Consists of modular panels which are assembled together using a welded or bolted method of construction
- Tested and certified by the ECB•S to the latest security standard, CEN 1143-1
- Can be integrated into various environments (for example new buildings, existing buildings and to strengthen strong room units)
- Can be designed on a bespoke basis, to suit any shape or size, subject to a full and comprehensive site survey
- Available in a range of security grades

Grade	Wall thickness (mm)	Weight per m2 wall, floor, ceiling (Kg)	Max span (clearance) for a permissible ceiling load of		Retail Price	Delivery & Installation Price
